

# Ford Puma: Ingenious Design

## Space: the final frontier

The new Ford Puma uses innovative solutions to maximise load space. With class-leading uncompromised luggage capacity of 456 litres, Puma can accommodate a box 112 cm long, 97 cm wide and 43 cm high with the second row of seats folded.

More than just a large luggage space, it's a clever luggage space, too.

## The Ford MegaBox

Puma features the Ford MegaBox, a secure storage area beneath the adjustable floor for dirty, or wet items. The lower load box can house items up to 115 cm tall, including unstable items such as household plants. The extra depth makes it possible to house two full size golf bags upright in the boot.

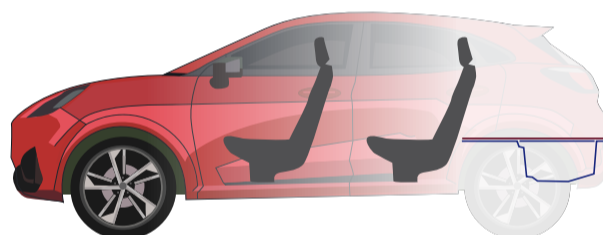

## The adjustable load floor

Puma's super-strong, lightweight and adjustable load floor is constructed from 100 per cent recycled paper and water-based glue, sandwiched between two layers of composite material.

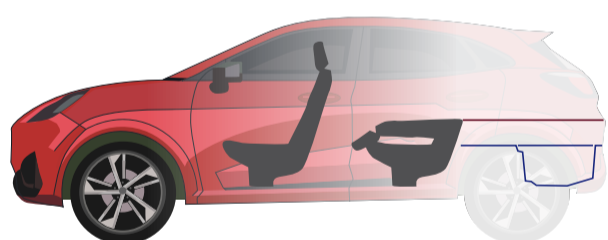

The shelf's incredible strength comes from a resin-reinforced honeycomb construction similar to those used to create super strong yet lightweight aerospace frames and sports equipment such as skis.

## Configure it your way

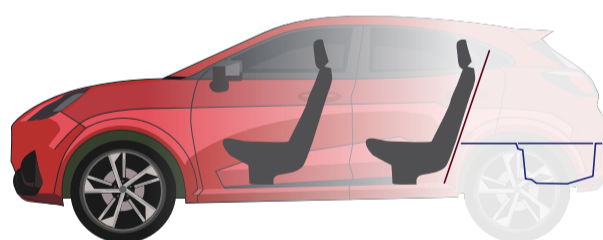

Puma's adjustable load floor can be easily repositioned with just one hand. The floor can hold any of three positions in the cargo area for maximum flexibility:

In the lowest position, it serves as a load floor for maximum storage

In the middle position, it sits flush with the flat folded rear seats and creates a secure storage area beneath the floorboard

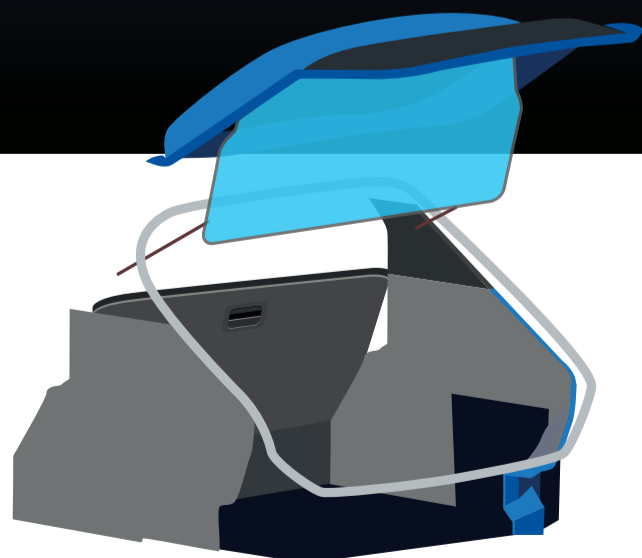

When not in use it can be removed and stored vertically against the back of the second-row seats

## Easy access

In addition to its class-leading uncompromised luggage capacity, Puma also can boast a class-leading access with a rear hatch opening width of 1000 mm, making it easy to load large, bulky items.

Luggage capacity	456 litres
Tailgate access width	1000mm
Luggage height	825mm
Luggage height with Ford MegaBox	1143mm

## Hassle-free parcel shelf

Puma's unique and innovative parcel shelf solution is mounted to the tailgate, rather than against the seat backs.

The parcel shelf folds neatly out of the way when the tailgate opens to ensure easy access and loading.
