

FORD MUSTANG MACH-E

## MAKING MUSTANG MACH-E MOVE: THE ALL-ELECTRIC POWERTRAIN

- 1 FRONT ELECTRIC MOTOR**  
Placed in line with the front axle on Mustang Mach-E models equipped with AWD, this is the secondary unit providing power to the front wheels.
- 2 HIGH-VOLTAGE BATTERY**  
Located below the floor and between the front and rear wheels, all energy required to power the vehicle is stored in this battery.
- 3 REAR ELECTRIC MOTOR**  
Placed in line with the rear axle, this is the primary unit providing power to the rear wheels.
- 4 CHARGE PORT**  
Enables the battery to be charged using an external source. The Charge Port can be connected to domestic power outlets or higher power public charging points.
